(54) Title: SPECIFICATION ADJUSTABLE THRUST TEST SUPPORT MECHANISM

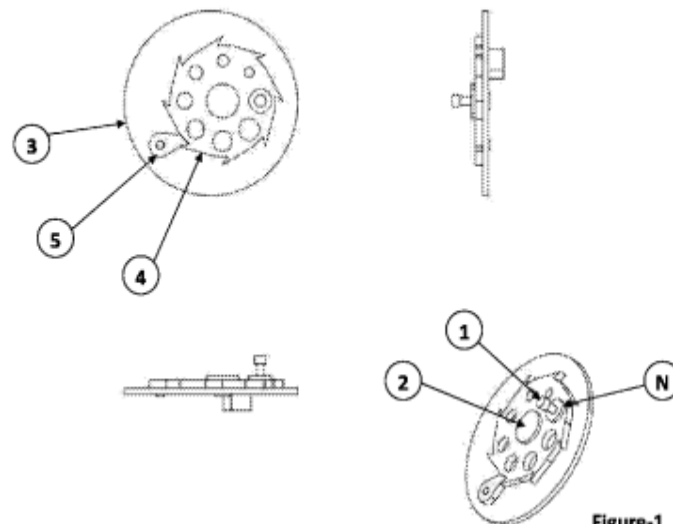

Figure-1

(57) Abstract: This invention is a binding material which is placed over the dentin layer of the force applied axially (variable) that is used to measure the resistance of this material results in order to test the platform and the property is related to the mechanism adjustable push support lower support (3), pin (1), and lower platform (3) to be centered attachable-detachable manner is positioned in the upper platform (4), the upper platform (4) is fixed on the arm (5) and the lower platform (3) of the upper platform (4) the relationship between providing and fixing screw (2) that is has.
